## **Technolink of the Rockies Educates Customers on the Importance of Cybersecurity Insurance**

*Leading MTSP Shares How to Protect Businesses from Cybercrime*

ENGLEWOOD, CO – August 30, 2022 - Technolink of the Rockies, a leading managed technology services provider (MTSP), is educating small to mid-sized business (SMB) owners on how they can protect their organizations from the crippling blow that a cyberattack wields upon any organization with cybersecurity insurance. While cyberattacks have unfortunately grown in frequency and according to Inc.com, “60 percent of small businesses fold within 6 months of a cyberattack,” Cybersecurity insurance has become a vital component of any organization’s risk mitigation efforts because it can eliminate liability from any damages which occur as the result of a cyberattack. This includes ransom payments, regulatory fines, public relations costs to restore your reputation, employee/customer lawsuits and lost income as the result of a breach. With the median cost for cybersecurity insurance at \$140/month, (this varies from company to company based on a wide array of factors), many businesses are opting to secure this type of insurance coverage because it allows them to continue running their businesses without incurring

large capital expenditures, while providing them significant “peace of mind.” Meanwhile, they can allocate budget for IT and network security improvements, which can be spaced out over time, in a sustainable manner.

While every business that plans to continue to operate online would do well to examine cybersecurity insurance, Jeff O’Neill, VP of Sales of Technolink of the Rockies summarized, “If your business collects sensitive data - like credit card numbers, account numbers, Social Security numbers or medical records, you’re likely a target for cybercriminals.” He continued, “Many small businesses assume that cybercriminals are only interested in targeting large organizations, from whom they can extort very large ransom payments, however, in recent years, those larger organizations have responded to this focus by investing heavily into their IT and cybersecurity. This is dissuading many hackers from targeting larger organizations with robust defense systems and has effectively redirected many cybercriminals’ efforts towards small businesses who possess weak IT infrastructure, yet valuable data. Essentially, small businesses are now the ‘low-hanging fruit’ for hackers.”

Cybersecurity insurance policies are an effective solution for SMBs to mitigate their risk in the short-term, while they build stronger IT infrastructure and bolster their cybersecurity in the long-term. However, one critical stipulation of cybersecurity insurance policies is that they do not cover prior acts of which you had knowledge before you started your policy. In industries with strict regulation on collected data, like healthcare or finance for example, cybersecurity insurance becomes exponentially more valuable because of the unforgiving nature of such industries. Additionally, another key stipulation which business owners need to be aware of is that they may not cover interruptions which are caused from a third-party computer system failure.

“A decade or so ago, most business owners could get away with a cyber-defense strategy of simply hoping their business was overlooked as a target. However, that is no longer the case,” added O’Neill. “Cyber liability insurance is an extremely cost-effective solution which SMBs can leverage in the short-term to mitigate this threat so they can get back to focusing on what matters: which is growing their business. While we are in the business of offering IT-

related products and services, and we may potentially be cannibalizing additional sales by spreading this message, we think it's so important that we can't remain silent. At the end of the day, our business exists because we help our fellow entrepreneur to become more productive and thrive and our larger mission is to support business owners by keeping them in business. Business owners are the backbone of our country's economy, and we are happy to share our expertise if it keeps even

one more entrepreneur in business."

### **ABOUT TECHNOLINK OF THE ROCKIES**

Founded in 1983, Technolink of the Rockies is able to fulfill all of its customers' technology needs. The company is the premier resource for business phone systems (VoIP and Session Initiation Protocol (SIP) provisioning), Managed IT Services, Network Security, Video

Conferencing and Disaster Recovery. Technolink of the Rockies has built a team of professional voice and data specialists whose goals are maximum customer satisfaction through total customer service. The company designs, implements and monitors end-to-end solutions.

Technolink of the Rockies delivers the future by linking business technologies today! For more information, please call 303-790-8700 or visit us at [www.asktechnolink.com](http://www.asktechnolink.com).
